

Guidance on Allowed Tack International Mounted Games Association

GENERAL

The pictures in this document show bits and bridles that are (or are not) allowed under dressage rules and therefore under IMGA rules.

SADDLES

Treeless saddles are now permitted under IMGA rules.

Saddles MUST have full length lateral base panels and a central gullet.

This means that there must be fitted panels under the full length of the saddle that give a channel between the saddle and the pony's spine.

The pads must be part of the saddle.

There must be clearance between the saddle and the pony's back.

ALLOWED

NOT ALLOWED

GUIDANCE ON ALLOWED TACK
